## Mazda 2 :

### **Button Replacement Procedure** (This installation can be done from inside or outside of remote)

1. Open remote by unscrewing 2 screws on the back of the cover.
2. Remove old, worn through button accessing it from inside of remote.
3. Press fit new silicone button into the front cover from inside (as shown for respective models). No gluing needed.
4. Test your remote with the new button fitted in.
5. When installing from outside simply press fit new button in.

Once button replacement is finished, remote will work straight away with **no need for re-programming.**
