

*“Peugeot 106 306 307 405 406 - Worn out button replacement procedure”* was prepared by Polmex , the West Australian innovative Engineering Company, specializing in design and manufacture of special purpose Silicone products. Supplying to the market Silicone Replacement Buttons for worn remote keys of various car makes and models.

For Orders please visit us on line at [www.polmex.com.au](http://www.polmex.com.au)

Our replacement Buttons are made from LSR Silicone and will not brake, due to deteriorating effects of sunlight, water and chemicals commonly encountered in service such as Detergent, Oil, and Methanol. **Silicone buttons are flexible and will not deform, change shape, degrade and brake over period of time. They are much more durable than originals and are designed to Last.**

**This instruction is applicable for replacing worn buttons in 1 Buttoned Peugeot remote with square switch:**

Use phillips screwdriver to unscrew remote and than prise it open with flat screwdriver on the split line.

Once you open your remote you end up with bottom part consisting electronics and top part with plastic button.

Remove old plastic button ending up with hard plastic shell ready for inserting new silicone button in.

Next press new button in and put your remote together in reverse order.

Once new is button inserted, your remote is ready for use as no re-programming is needed.
